

*"For the things we have to
learn before we can do them,
we learn by doing them."
– Aristotle*

April 15, 2011

Dear Colleagues,

On behalf of the planning committee, we are pleased to invite you to the 2011 Summer Institute for Informed Patient Choice. This year's focus will be on designing, launching, and successfully sustaining decision support services in a clinical setting.

We have carefully planned this year's agenda to incorporate essential elements of health care delivery science. There will be three days of didactic multi and interdisciplinary presentations by local, national and international innovators delivered in a modified case study format. This framework will allow a comprehensive evaluation of barriers and facilitators to success. Patients and families will also be engaged to provide the voice of the consumer regarding patient-centered health care design and delivery.

Don't miss this opportunity to network, share ideas and strategies, and hear from those who have dedicated themselves to *"learn by doing"* in the quest to make informed patient choice and patient decision support the standard of care internationally. Registration will open soon. Please visit our website for updates and information <http://tdi.dartmouth.edu/centers/informed-choice/>.

We hope that you can join us!

Sincerely,

Dale Collins Vidal, MD, MS
